Instructor: Dr. Josh Neunuebel
Office location: 107 McKinly
Office hours: Monday & Friday 3:30-4:30 pm and by appointment
Office phone: (302) 831-4811
Email: jneunuebel@psych.udel.edu
Class time: Tues/Thurs, 9:30-10:45 am
Class location: McKinly Lab room 061

Course description:
The *Brain and Behavior* course will provide a general overview of brain structure and function. Students will gain a basic understanding of how the brain controls behavior and the ability to think critically about scientific problems, as well as evaluate the primary literature in the field of behavioral neuroscience. The course will cover sensory systems, sleep and biological rhythms, psychopharmacology, reproductive behavior, emotion, learning and memory, and neurological disorders. Students will be introduced to basic concepts in lecture and delve into more detail during presentations of classic papers on selected topics. Discussion classes will focus on structure of the nervous system, vision, sleep, reproductive behavior, and autism.

Reading:
The main text will be *Physiology of Behavior*, the 11th edition by Neil R. Carlson.

In addition we will be reading articles from the primary literature. Articles are available for download on the course website.

Website:
[https://jneunuebel.psych.udel.edu/Courses/default.html](https://jneunuebel.psych.udel.edu/Courses/default.html)

Grades:
Midterm: 222 points
Final: 270 points
Presentations and class participation: 162 points
Science joke: 6 points

Exams:
Midterm - October 2nd
Final – Date, time, and location to be determined

Class participation:
Students will be grouped together (3 or 4 students/group) and present the assigned paper. Presentations should include parts describing the background, material and methods, results, and conclusions. Presenters will ask audience questions related to the paper and the audience members are expected to actively engage in answering the questions. In
addition, the audience is encouraged to ask the presenters questions throughout the discussion. Presenters are encouraged to make an effort to address all questions to the best of their ability. Each presentation is worth 75 points. During a presentation, students in the audience will be awarded 3 points for correctly answering a question and 3 points for asking a question (6 points total). Points for the presentation will be awarded based the following rubric.

<table>
<thead>
<tr>
<th></th>
<th>Inadequate</th>
<th>Needs Improvement</th>
<th>Adequate</th>
<th>Excellent</th>
